

CATHODIC PROTECTION

ZKT5-AC/DC Coupon Terminal

Independent terminal system
for Coupon Current Measurement

ZKT5-AC/DC is an independent terminal system which allows 5 terminal coupon connections. The terminal can be mounted in a test station and current measurement of AC and DC coupon can be made according to EN 15280.

The three-position switch provides the following connections between AC or DC Coupon1 and the Structure terminals.

AC	DC
» Connection over 10R Resistor	» Connection over 1R Resistor
» Open circuit	» Open circuit
» Short circuit	» Short circuit
